

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

A
SCHOOL ATLAS
OF
MODERN GEOGRAPHY:

WITH
AN INDEX,

CONTAINING

THE NAMES OF THE MOST IMPORTANT PLACES LAID DOWN IN THE MAPS, THE COUNTRIES IN WHICH THEY ARE SITUATED,
AND THEIR LATITUDE AND LONGITUDE.

BY ALEXANDER REID, LL. D.

Rector of the Circus Place School, Edinburgh, Author of Rudiments of Modern Geography, Outline of Sacred Geography,
Rudiments of English Grammar, Rudiments of English Composition, A Dictionary of the English Language, &c.

EDINBURGH:
OLIVER & BOYD, TWEEDDALE COURT.

LONDON: SIMPKIN, MARSHALL, & CO.

MDCCCXLVIII.

ENTERED IN STATIONERS' HALL.

PRINTED BY OLIVER & BOYD,
TWEEDDALE COURT, HIGH STREET, EDINBURGH.

P R E F A C E.

THE following Atlas has been prepared chiefly with the view of supplying the demand occasioned by the increasing attention paid to the study of Geography in Parochial and other Elementary Schools; and it is offered to the Public at a price which places it within the reach of many who have hitherto been prevented, by the want of a cheap manual, from cultivating that interesting and useful branch of education. It is as full as appears to be necessary in a School Atlas, the Maps of the World and the five Continents, with the Map of Australasia and Polynesia, presenting a distinct view of most of the countries and islands on the globe, and to these being added separate Maps of England, Scotland, Ireland, France (including Belgium, Holland, and part of Spain), Germany (including Prussia, Switzerland, and the greater part of Austria), Italy, Hindostan, the United States, and Palestine.

The Maps have been constructed from the most recent authorities, and revised with the utmost care.

Very great labour has been bestowed upon the Index: it comprehends the Name of every Place laid down in the Maps (except in those of Hindostan, the United States, Australasia and Polynesia, and Palestine, which were not contained in the first impression of the Atlas), and, besides the Number of the Map in which each place is to be found, mentions also the Country in which it is situated. The Latitude and Longitude, which are given with the greatest possible minuteness, have been compared with the Tables in the *Connaissance des Temps*, the *American Almanac*, the *Nautical Almanac*, and other works of established reputation. The Names of Places are accented according to the best authorities on the subject, or according to the analogy of similar words, either in the language of the country in which the places are situated, or in the English language.

In short, no exertions have been spared to combine cheapness of price with convenience of form and size, distinctness of delineation in the Maps, and accuracy in every department of the work.

CONTENTS.

1. THE WORLD.
2. EUROPE.
3. ASIA.
4. AFRICA.
5. NORTH AMERICA.
6. SOUTH AMERICA.
7. ENGLAND AND WALES.
8. SCOTLAND.
9. IRELAND.
10. FRANCE, BELGIUM, HOLLAND, AND PART OF SPAIN.
11. GERMANY, PRUSSIA, AND SWITZERLAND.
12. ITALY.
13. HINDOSTAN.
14. UNITED STATES AND CANADA.
15. AUSTRALASIA AND POLYNESIA.
16. PALESTINE.
